GROUP PROJECT

Each group must consist of 3 members. Each group can use one or more dataset. The result will be presented at the end of semester and the report will be submitted at final exam.

Components	Description
Scope	Company product stock prediction
Algorithm	Regression
Dataset	Company product stock dataset
Type of Data	*txt
Goal	Creating time series prediction algorithm for predicting company product stock. Each group makes a prediction for at least 5 period (week/month/years/etc).
URL Dataset	https://tinyurl.com/DatasetBigData
Example notebook	Tesla product stock prediction https://tinyurl.com/ContohNotebook
